Lacombe Milling Company

16,000 HEAD OF FEEDERS
FOR CENTRAL ALBERTA

THE RANCHER FARMER LIVESTOCK FEEDING POLICY

The rancher farmer livestock feeding policy will be in effect in the Lacombe District, again this year.

Approximately eight thousand cattle and the same number of lambs will be fed throughout Central Alberta during the coming winter. While some of the lambs will be fed by private feeders all the cattle and some of the lambs will be placed through the Central Alberta Livestock Feeders' Association.

The following contract has been drawn up by the executive of the Association and is being published for the benefit of those who may be interested in the project with the idea of possibly securing some of this stock to feed under contract.

Those wishing further information that contained in the contract would be well advised to get in touch with Sam Henderson, Supervisor, before all these cattle are placed.

The preliminary contract subject to slight revision is printed herewith—

THIS IS AN AGREEMENT BETWEEN _____ hereinafter called the BREEDER and _____ hereinafter called the FEEDER.

Whereas the Feeder is desirous of feeding and finishing for market _____ head of _____ which are now owned by the Breeder, and whereas the Breeder is desirous of having the said number of cattle fattened for market by the Feeder, this agreement has been entered into.

8-ROOM HOUSE FOR RENT
On Edmonton Trail between Hamilton and Oliver Avenues. Rent \$15.00 per month. For particulars apply at Town Office. Immediate possession.

Trade in your Old Toaster

SAVE \$1.50

on a new

It is the intention of the Breeder to sell these cattle after they have been thoroughly fattened and finished by the Feeder at whatever price he may deem satisfactory and to whatever party he may elect. It is the intention of the Feeder to thoroughly finish and fatten these cattle so that they will command the highest selling price when they are sold, consequently the Feeder agrees to thoroughly finish and fatten the said number of animals.

The Breeder agrees to pay to the Feeder a price per pound for each pound of gain in live weight which the cattle shall make while they are being fed by the Feeder. The price per pound to be paid the Feeder to be calculated or based on the selling price per pound live weight, plus twenty per cent for calves and thirty per cent for yearlings.

The selling price shall mean the amount of money remaining after all railway, yardage commission, insurance, feed, shrinkage and other charges which are naturally incurred in the marketing of livestock has been deducted from the gross selling price.

The Feeder or his representative is to inspect these cattle as to weight, health, age, quality and general condition, at the Breeder's home and before they have been driven to the railway loading point, for shipment to the Feeder's feed lot. After such inspection, the Feeder must be satisfied with the cattle supplied him by the Breeder. Freight charges from the Breeder's ranch to the railroad unloading platform nearest the Feeder's feed lot will be paid on the yearlings by the Breeder and on the calves by the Feeder.

The cattle will be weighed over proper scales at the Breeder's ranch, directly off cows or out of weaning pens, as the Breeder may elect, immediately before they are driven to the railroad for shipment to the Feeder. A deduction of three per cent of the gross weight shall be made from the gross weight by the Breeder as a shrink allowance. The net weight so determined shall be the weight at which the Feeder accepts the cattle for feeding purposes. Likewise at the end of the feeding period, and when the cattle are being marketed, the Feeder shall weigh the cattle directly out of his feed lot and over a suitable scale, and shall grant to the Breeder a deduction of three per cent as a shrink allowance.

The Feeder is to deliver the cattle, free on cars, and in good order to the Breeder, after they have been weighed and are ready to be marketed by the buyers.

It is deemed necessary by the Breeder and the Feeder that a competent man shall act as a feeding supervisor. It shall be his duty to aid the Feeder, in an advisory capacity, with respect to his feeding operations, and the Feeder agrees to heed the advice given by the Supervisor. The appointment of such a Supervisor shall rest with the Feeder and the Association, each agreeing to pay fifty cents per head, such payment to defray the expenses in connection with the supervision.

In the event that the Breeder and the Feeder cannot agree between themselves as to whether the cattle are properly finished for market, then the Supervisor shall decide the matter for them. The opinion of the Supervisor shall be binding on both parties.

If in the opinion of the Supervisor, the Feeder neglects the said cattle and does not properly feed or care for them, then the Supervisor shall give notice to the Breeder of such opinion. Upon receipt of such notice in writing from the Supervisor, the Breeder may take the cattle from the care and premises of the Feeder and dispose of them as he sees fit. The Breeder is to pay to the Feeder a fair basis of settlement as established by the Supervisor. The Feeder agrees to deliver the cattle free on cars and in good order, waiting for his money until the cattle are finished and sold.

It is agreed that losses through death shall be proportioned among the total number of cattle being fed and borne equally by the Feeder and the Breeder where cattle are being fed. The price for calculating the value of the calf or yearling as the case may be shall be fifty cents per hundred pounds above the price of choice calves or yearlings as the case may be at the Calgary stock yards at the beginning of the feeding period.

The Supervisor shall have authority to take unthrifty, defective, or injured animals and dispose of them locally to best advantage.

The Supervisor shall be authorized to issue a lien against animals covered in the feeding contract to the extent of two (2) cents per pound on the gains made.

For the purpose of written notifications, the address of the Breeder shall be his registered office.

The address of the Feeder shall be _____ day of _____

IN WITNESS WHEREOF, the parties have hereunto set their hands and seals this _____ day of _____

_____ the Breeder
_____ the Feeder

An Interesting W. I. Meeting

Miss Helena R. Oldring, of Mirror, Constituency Convener, addressed a special meeting of the Women's Institute on Thursday, Sept. 14th, held at the home of Mrs. W. Teward.

Following a discussion a resolution was passed to continue as an Institute and a Home Economics Course is to be subscribed for. The speaker also brought much useful information, one fact being that women attending the W.I. meetings have no voice or vote in the proceedings and are not considered members unless the regular fee has been paid. "If Institute women throughout the world would link hands," said the speaker, "they would go six times around the world." The speaker brought greetings from the Council and an interesting report of the convention, which gave items of the outstanding work being done by Women's Institutes in Alberta. At Fairview in District No. 1, Institutes had erected and fully equipped a hospital and also paid the Nurses' salaries. The objective for the next two years is to improve sanitary conditions in the Province. She also mentioned the benefits derived from the picnic at the Experimental Farm this summer and urged that each of the nine Institutes in this Constituency send at least ten members to the picnic next year.

Mrs. Oldring concluded her address with a splendid paper on "Living a Life Making a Living".

"To live a life, in other words, to test a character, we must see if that life comes up to certain standards. To do this one has to consider some of the failures. One of the commonest failures is brought about by things that are the crowding out of things that really matter by things that do not matter much. In order to make life worth while we must have the ability of putting first things first. Methuselah lived over nine centuries, and so far as we have record never did anything to make the longest month while. Our lives today are short and there are more things to do than we shall ever get done. We must learn to discriminate and not fill our lives with the unimportant things."

Examples in reading—We read enough, but what do we read? We forget if we read this; we cannot read that; and in this way we litter our minds with casual trash and destroy our taste for good literature. The younger generation need examples rather than critics. Parents are preoccupied with many tasks and find themselves of responsibility by using schools, scout troops, and summer camps as substitutes for family life instead of as helps. A mother puts it: "When Father and Mother forsake me then the Boy Scouts will take me up." It is not a matter of luck or time. They have time to do the essential things. It is simply a matter of putting first things first.

Self-control is another part of character. We are extending our freedom. Women have expanded their lives in educational and political freedom. Some are not profiting by these enlarged privileges, but are showing their lack of balance in handling them. Business men who are progressive and progressive and prosperous when credit is easy and all is going well, sometimes find they are not ready to meet an emergency. Credit tightens and they have no steadfastness to meet the strain.

Real religion is the greatest force to stabilize and fortify people and build up moral foundations. The Bible says, "Everyone, therefore that heareth these words of mine and doeth them shall build his house upon a rock." Real freedom is not the mere release from old restraints, but the substituting of inward self-control for external restraints. Conventional rules were made to help us until we have acquired self-control and no longer need these restraining rules. If life has not this self-control it is like a young tree set in the city parks without the support of an iron cage. The only freedom it enjoys is to be blown down by the winds.

The next test we shall consider is a High Opinion of One's Self. One should always associate oneself with the best. Familiarity with crime, vice and sex only coarsens the nature. High ideals of purity should be set before youth. Life is sacred and they should be taught to look up instead of down—to read and see the good deeds which are done rather than the records of crimes committed. In all life there is a reverence for the sacred. For example, why do we go to Church? There is a hunger for the assurance of the reality of the unseen. We wish to strengthen our confidence. Holmes once said, "There is in the corner of my heart a plant called reverence which needs watering about once a week."

Happiness is the next test. There are three classes of people:

1. Those who dislike duty and refuse to do it.
2. Those who dislike duty and drag themselves to do it.
3. Those who do their duty and thoroughly enjoy it.

It is the third class who get enjoyment and true happiness out of life. They consider duty a privilege. For success in a vocation one must pick the task which he considers it a privilege to work at. Good and bad fortune befalls everyone. If one insists on discovering something to be unhappy over there is nothing to prevent him finding it. Every life has its weak spot. On the other hand there are few lives who cannot discover plenty of things to be happy over. Happy people are unselfish and appreciative. It is a strong idea to think that goodness means repression. It frees people from fear, futility and sin. You can know a real Christian by his buoyancy.

Lastly we must consider the test of obedience to authority. At times it is justifiable to break the laws of man to obey the laws of God. People make laws and should gladly obey them. The business of the lawyer is to interpret the law, not to make the laws. Some people use and show us means by which the law can be avoided. The lawlessness of a country is caused by a breakdown of authority in the state—in the homes and in the individual. The government should exercise authority in the state. The parents in the home. In reality there is just as much authority in the family as there ever was, only the children exercise it. The individual should have obedience to the highest he knows—Obedience to God is the core of character.

BENTLEY NEWS

Miss Mary Dwyer left for Edmonton on Thursday last. She will attend Laminartherapy school for girls during the coming week.

Mr. Geo. Garries, Sr., was hostess to the Ladies Aid of United Church last week. A large number of members and visitors were present and the hostesses served lunch.

A property was put up for sale last week whereby Pave Johnston takes possession of the Dr. McLean residence on McPherson avenue. This is a good property and with the installation of a furnace and electric lights which are under consideration, Mr. Johnston tends to have done, will make a nice home for himself and family.

Mrs. Packer is up from Calgary on account of the serious illness of her mother Mrs. C. (Granny) Thorp, who is a patient in the Bentley hospital. A change in the personnel of the staff of the Bentley Co-op. store took place last week, whereby Mr. Vant, Calgary, of the Credit Men's association is manager for the present, and Mr. Brimner, of the Bentley hospital, is assistant. Mrs. Page is remaining with the business for the present.

The public and high school opened last week. Dick Dameron, who has charge of the high school is a local young man, but a part of last year when he had charge of the Gull Lake School, has taught in other parts of the province. He comes well recommended from his former positions and we feel sure will make good here.

With Mrs. Dameron, he has taken up residence in the Peterson cottage near the school. H. A. Wilkie again has charge of the intermediate room, and during the past two years has proven his ability to fill the position. He and Mrs. Wilkie are again in residence in the Vedford cottage. Miss Schoop, in charge of the primary room, has been teaching at the Chapel school for the past couple of years. We feel safe in saying that the school board has made a good selection of the staff for this year and consequently will have a profitable year's work for the pupils.

Some of the pupils attending high school from outside points are as follows: Verona, Dorothy and Pauline Moore and Agnes Cabelka, from Gull Lake district; Beatrice Carrill, from Carvill school; Velma Zorl, from Lockhart school; Lynn Gelf, from Centerville school; Rosalind Bolle, from Sunset school; Vera Chailand, from Outlook; and Rachel Wardham, from Gull Lake.

ALIX NEWS

Richard Clark went to Lacombe early this week where he will remain for the school term completing his Grade XII.

In celebration of the anniversary of the foundation of Rebeccah order the local lodge entertained their members and a few friends to a banquet after their meeting on Monday night last.

Mr. Thos. Ross, of Lulu Island, B.C., was a visitor among his many old friends in this district the past week. He looks hale and hearty and enjoys a chat over the old days in Pleasant Valley and his experiences as Reeve of the Municipality. It is eleven years since Mr. Ross left this district to reside at the coast.

The first 1941 school to be delivered in Alix went to the Pood Elevator and was from the farm of Mr. VanZandt, east of town. It graded No. 1 Northern. A sample from Stone Bros. farm graded No. 1 by Manager Anderson. The machines are working in every direction.

School Fair A Success

Although handicapped by the withdrawal of the Government grant, and the elimination of the showing of livestock and poultry which in previous years resulted in a very large sum, the Lacombe School Fair Association held their annual fair on Friday, Sept. 15, with 600 schools competing, Le. West Branch, Sunnyside, Spruceville, Central, Milton, Spring Valley, Arbroath, Parkdale, Lacombe and Mountain Grove, three less than last year.

There were nine hundred entries and despite the drizzling rain which fell all afternoon, the attendance was good. Owing to the dismal weather conditions it was necessary to postpone the sport competitions, and these will be held at some future date. Prizes were won as follows: Baking Powder cake, Rosalie Southward, Spruceville; Muriel Pearce, Central. Map of Canada, May Duffy, Spring Valley. Collection of vegetables, Spruceville school; Boy's Pony, Donald Henderson, Central; Wallace Graves, Lacombe; Donald Ogilvie, Elkhorn; Norman Shaw.

Girls' Pony—Mary Ogilvie, Elkhorn; Laura Reisterer; Margaret Woody, Mt. Grove.

Best Judging, John Morrison, Canyon; Charles Blackmore, Mt. Grove; Norman Morrison.

Hog Judging—Charles Blackmore, John Morrison, Norman Morrison.

Girls' Sewing Competition: plain hemming (over 12) Jane Shoenheit, Arbroath; Goldie Nixon, Central. (Under 12) Nettie Gibson, Mt. Grove; Edith Clague, Arbroath.

Potato Spuds—(White) Joe Stout, Spruceville; Dick Boulter, Mt. Grove; Janice Stout, Spruceville. (Red) Earl Ald Ogilvie, May Ogilvie, Elkhorn; Jane Hill, Milton. (Russet) Ronald Ogilvie, Mary Ogilvie, Jane Hill.

As no judges were sent out by the Department this year, two local ladies, Mrs. H. Macdonald and Mrs. B. Macdonald and Experimental Farm officials assisted with the judging.

HELEN BOOTH IS SUPERINTENDENT VICTORIAN ORDER

Edmonton—Miss Helen Booth, daughter of Mr. and Mrs. J. L. Booth, Lacombe, who has for the past three years been associated with the staff of the Victorian Order of Nurses, has been appointed to the position of superintendent of the order in Edmonton upon the resignation of Mrs. Alexander Currie, formerly Miss Rae Shipman. The appointment was unanimously concurred at the opening meeting of the V.O.N. Board held in the Macdonald hotel on Friday afternoon. Capability and conscientious service of Miss Booth has long been appreciated and her appointment to the responsible position of superintendent is one of great satisfaction. Miss Booth received her training in the Royal Alexandra hospital here and also took the intensive training course given by the V.O.N. in Montreal.

Miss Booth, who has been carrying on since the resignation of Mrs. Currie, reported 512 visits made with 163 new cases. There were 19 confinements attended, and assisted in eight operations. There were 153 free visits made and 117 part-paid calls. Two free confinements were attended. The amount of \$4.10 was collected for some of the visits.

RIMBEY NEWS

Mrs. Louise Calkins has returned to Lacombe, after spending a week with her sister, Mrs. Geo. Richards.

Mrs. J. Beatty received word on Wednesday of the serious illness of her father, at Morden, Man. With Mr. Beatty she left by motor at midnight for Edmonton, Mr. Beatty returning to Rimbey on Thursday.

A new house is being erected by the Alberta Wheat Pool for their agent, M. B. Tuckey, in East Rimbey, just east of Fred Marriott's. The residence, which will be of frame construction, will be 24 x 28 feet, lathed and plastered with a small basement, 12' x 12' feet.

A. H. Hayden underwent a very serious major operation in St. Paul's Hospital on Thursday, September 7, and although his condition since then has at times given cause for anxiety, a slight improvement was reported on Thursday.

Kathleen Davidson, five-year-old daughter of Mr. and Mrs. Davidson, of the Wilkenden Green district, was brought in to St. Paul's Hospital last week, with both bones in her right forearm broken. After receiving attention she was able to return home the following morning.

F. E. Hawkins, who farms about nine miles southeast of Rimbey and in addition runs an apriary, states that this year has been one of the best he has experienced so far in the production of honey. Mr. Hawkins has 17 hives and expects to extract 2,000 lbs. of amber liquid as a result of the best activities this summer, a quarter of this amount coming from one hive alone.

Statesman From Antipodes Issues Grave Warning Respecting Building of Warships On Pacific

Hon. William Downie Stewart, M.P., former minister of finance in the New Zealand Government, the statesman who negotiated the trade treaties between New Zealand and Australia, Canada, Japan and Belgium, started members of the Institute of Pacific Relations by declaring the institute might have taken up as a subject for discussion the present feverish building of battleships by great nations on both sides of the Pacific. His view was that if causes of friction were to be studied, building of war fleets could not properly be ignored. This should be done before serious events occur, he said.

"I am not a pessimist," he exclaimed towards the conclusion of his vigorous speech delivered from a high-backed chair, "for he is permanently crippled. I may be a fatalist insofar as I realize if certain factors are at work they will produce a certain result unless a solution is found.

"When I see on both sides of the Pacific great nations feverishly building battleships, armadas manoeuvring, I am bound to ask myself what for. If you build a mill it wants grit."

"There is no peace machinery in the position," he continued, "and so the position seems to me grave and serious, disturbing and menacing. I will say if you talk war you will get war. And also it is futile to cry peace."

Canadians Eating More Pork

Figures For Last Year Show 91.70 Pounds Per Person

Reminiscence of the brave old days when a barrel of pork constituted an ever-ready standby in the pioneer's larder, Canadians in 1932, according to the latest statistics, ate more pork and less beef and eggs than in the preceding three years. In 1932, also, more turkeys, ducks and geese were eaten than in 1931, but less than in 1930 and 1929. Again, in 1932 the consumption of chickens was less than in the preceding year.

Reckoned in percentages, every Canadian man, woman and child in 1932, individually consumed 91.70 pounds of pork, 56.02 pounds of beef, 6.97 pounds of mutton, 7.87 pounds of chicken, 1.75 pounds of turkey, .41 of a pound of duck, .83 of a pound of goose, and 28.36 dozen eggs. The estimated total consumption for the last year is: Pork, 96,485,673 pounds; beef, 58,569,857 pounds; mutton, 7,182,356; chicken, 82,658,449 pounds; turkey, 18,424,340 pounds; duck, 4,285,215 pounds; geese, 8,670,000 pounds, and eggs, 297,949,330 dozen. Dominion Department of Agriculture.

Menace To Poultry Stock

Lice Are Greatest Danger To Life Of Baby Chickens

Poultry experts and practical poultrymen recognize the danger to the life of the baby chick if it comes in contact with lice or mites. Prof. J. Holmes Martin, of the University of Kentucky, points out that much of the loss among chicks raised on the farm can be attributed to lice and mites. He says: "The most important single factor in preventing loss from these pests is to free the mother hen and brooding equipment from lice and mites before the chicks hatch."

To rid the flock of lice, Professor Martin suggests the simplest treatment of applying Black Leaf 40 to the roosts about one-half hour before roosting time. It should be painted on top of the roosts with a small paint brush or applied in a thin stream with an oil can. When the birds go to roost, the lice are given off which kill the lice while the birds are roosting. It is necessary course, in order to get a complete kill that all the birds spend the night on the treated roosts.

Magazines For McGill

About 3,500 Received Regularly By Montreal University

McGill University, Montreal, is one of the largest subscribers of periodicals in the world. Statistics completed show that the university regularly receives some 3,500 magazines. Some 2,000 of these are subscribed for in the regular way, a total of 930 are presentation subscriptions, while 560 are on the exchange list with other institutions. The entire collection has been rated one of the best in the world by visiting librarians.

Scotch Boys Growing Taller
The average schoolboy in Edinburgh is two inches taller and 10½ pounds heavier than the boys who attended school in the 1913-14 season, while the girls are half an inch taller and eight pounds heavier. These figures are revealed in a report just issued by Dr. John Guy, medical officer of health.

We're mad at fortune-tellers. One told us we would receive several interesting letters, and we rushed home and were served alphabet soup.

W. N. U. 2010

Sleeping Sickness

Medical Men As Yet Know Very Little About This Disease

Both medical men and laymen are interested in what is going on these days at the County Hospital of St. Louis, Mo. There, in an isolated ward, many persons are in a stupor from which physicians are unable to rouse them. Some patients have died without waking, while others have managed to shake off their strange drowsiness and return to their homes and normal occupation, although they still are under medical observation.

Not very much is known about encephalitis, the form of sleeping sickness which afflicts these St. Louis patients. Not only is the germ unknown, but the means of infection and distribution has not yet been detected. The superintendent of the County Hospital thinks the present run of cases began with an outbreak of mosquitoes, so authorities in St. Louis poured oil on all patches of standing water and appealed to residents to remove tin cans, drain off ponds and take other precautions.

It is to be hoped this will have an effect. In the meantime laboratory specialists of the United States Public Health Service have undertaken a study of the current cases in the hope they may find some clue to the mystery of this unusual disease, which fortunately did not appear to be spreading very fast—Detroit Free Press.

A Great Internationalist

Fine Tribute Is Paid To The Memory Of Nansen

The English, always eager to honor any great explorer, have raised a singular monument to the memory of the Norwegian explorer and statesman, Fridtjof Nansen. A bill in the House of Commons, introduced by the late Sir Robert B. Lytton, has been taken over as a national trust to be dedicated to the memory of Nansen, one of the greatest explorers who became a great servant to humanity.

Lord Cecil said at the dedication that Nansen was an extraordinary man. He had so many sides to him; he succeeded in so many different objects in life. He was a great man of science, one of the greatest explorers of the world, a diplomat, a statesman, a philosopher, and he served all mankind. He made no difference whether he was serving the starving multitudes in Russia or the unhappy Armenians; any country that was in trouble had the certainty of his sympathy and service. Yet he was of simple character, and though devoted to Norway, was probably the greatest internationalist of his time. He was a dreamer who was concerned to find out what was at the bottom of everything in this life, and he was devoted to the cause of peace—Winnipeg Free Press.

Swimming Dogs Of France

Paris Police Proud Of Wonderful Work They Do

France obtained retrievers and Newfoundlanders from Britain to breed her "champion" police or swimming dogs kept by the Paris police, at all stations along the Seine. These dogs are trained to round up criminals who infest the banks of the river and to rescue people who have fallen into the water either by accident or intent. The Paris police are very proud of these dogs and of the wonderful work they do. A cross from the big Pyrenean sheep dog is largely used in the French army for carrying ammunition and medical supplies. The same breed, and both the long-haired and short-haired sheep dogs are kept at the various cetril cabins on the French frontier to detect and pursue smugglers, a work at which the trained dogs become experts. But the smugglers also use dogs to carry salt, tobacco, lace, liquors and drugs across the frontiers and it is often a battle of wits between smuggler dogs and customs dogs, the one seeking an unfrequented place in which to slip across in the dark, and the other on the watch to hunt him down.

Might Explain It

The big man, who had just been introduced to one of his host's guests, stood staring blankly at him for some time.

"You know, sir," he said after a while, "you look like a man I've seen somewhere before. Your face seems very familiar; you must have a double. Strangely enough, I remember I formed a strong dislike for the man who looked like you, but I don't remember having met him socially."

The other guest smiled and said: "Yes, I think I am the man you mean," he replied. "I passed the plate for two years at the church you attended."

Constructed a century ago, the front of the British Museum, London, England, has been cleared for the first time, only soap and water being used.

Roadside notice posted in New England: "By order of the selectmen, cows grazing by the roadside or riding bicycles on the sidewalks is hereby forbidden."

A proposed law forbids pedestrians in Lisbon to speak while crossing the street.

Poland has reduced its inheritance and gift taxes.

NATIONAL GUARD CHIEF

Went For Mental

Do you hate wasps? Yes, but what do you know of them? I have received my first serious lesson in natural history writes a Daily Sketch correspondent.

Hyde Park is swarming with caterpillars, and Arthur, the 70-year-old chair attendant, informed me that he had been waging war against them for the past 30 years. This waste of time annoys Liza, who spends her days retelling fruit at a spot near the Marble Arch entrance.

"Serves 'em right," she informed me. "Serves everybody right who owns 'em Park for killing all the wasps like they does." She has an idea that wasps are the natural exterminators of caterpillars.

"Do ask 'em they're treated nowadays," she said, with a shake of her head. "I allus say to everybody, 'Don't be too 'ard on 'em, for if it wasn't for the wasps there would be no fruit,' although I own they be a bit of a nuisance when they commence to crawl."

"They don't sting unless they're provoked. Why, if it weren't for the wasps a working 'ard all May you wouldn't get a strawberry, let alone a fruit 'arvest. Wasps be useful if they're let alone, and they do good work."

French Bread Unlike Ours

Is Darker In Color And More Like A Sponge

The difference between the bread eaten in France and that of Canada is mentioned by Arsene Henry, French Minister to Canada, as one explanation for the lack of demand for Canadian wheat in France. The hard wheat of Canada that is exported to France is used mostly for macaroni, spaghetti and such products, says Mr. Henry.

The ordinary bread bought in a baker's shop in France is not the white bread to which Canadians are accustomed. Instead it is a dark tint and is more like a sponge. It has a fine taste, but is not quite as good as the white bread made from Canadian wheat. At least that is the opinion of some of those who have eaten both kinds.

Danger In The Kitchen

Place Where Large Percentage Of Accidents Occur

The kitchen doesn't ordinarily seem like a dangerous place—except perhaps, when a truly inept cook cooking indigestible dishes is hot and does not wish to be disturbed.

But there were 28,000 deaths last year from accidents which took place in the homes of the United States and fully 24 per cent. of these occurred in kitchens. Falls and scalds seem to be the most prolific sources of home accidents. And while it is a bit difficult to see just how a safety code can be devised and enforced for the home, a little care and forethought in the midst of the daily round of activities ought to save a good many lives each year.—Chatham News.

Not For Royal Families

Belgium Would Make Dangerous Sports Illegal For Them

Loyal public opinion in Belgium is clamoring for flying, climbing high poles, sliding and such sports to be made illegal to be made illegal for the Belgian royal family, especially for King Albert. What provoked it was the news that the entire royal family, at an aerial display at Evere near Brussels, climbed into a new type of "plane" to see how it worked. It is not for royal families to try out fancy airplanes, and especially not together, says the crowd.

A Long Distance Order

Believed to be something of a record in long distance orders for flowers, an order was recently received from Louis Syberg, florist, Oslo, Norway, asking a Regina flower shop to send cut flowers to a party at Rouleau, Sask. The order was 15 kroner, about \$3.25, and came by mail.

EMBRACING HINDUISM FOR LOVE

A dramatic moment at Chalk Farm, London, as Miss Jessie Womack Medley, an English girl, was received into the Hindu faith. At the left is G. R. N. Kar, son of a Hindu millionaire, whom she married a year ago. At the right is Dr. Moonje, president of the Hindu Mahasabha, who performed the ritual that made the girl a full-caste Hindu.

Lesson In Natural History

Fruit Dealer In London Says Wasps Work For Mental

Do you hate wasps? Yes, but what do you know of them? I have received my first serious lesson in natural history writes a Daily Sketch correspondent.

Hyde Park is swarming with caterpillars, and Arthur, the 70-year-old chair attendant, informed me that he had been waging war against them for the past 30 years. This waste of time annoys Liza, who spends her days retelling fruit at a spot near the Marble Arch entrance.

"Serves 'em right," she informed me. "Serves everybody right who owns 'em Park for killing all the wasps like they does." She has an idea that wasps are the natural exterminators of caterpillars.

"Do ask 'em they're treated nowadays," she said, with a shake of her head. "I allus say to everybody, 'Don't be too 'ard on 'em, for if it wasn't for the wasps there would be no fruit,' although I own they be a bit of a nuisance when they commence to crawl."

"They don't sting unless they're provoked. Why, if it weren't for the wasps a working 'ard all May you wouldn't get a strawberry, let alone a fruit 'arvest. Wasps be useful if they're let alone, and they do good work."

Delegates To League

Hon. R. J. Manion Will Head Canadian Delegation At Geneva

Canada will be represented at the meeting of the assembly of the League of Nations by Hon. R. J. Manion, Minister of Railways; Hon. Philippe Roy, Canadian Minister in Paris, and Dr. L. A. Riddell, Canadian Advisory Officer to the League. Announcement of the selection of the Canadian delegation was made by Sir George Perley, Acting Prime Minister.

Dr. Manion will head the delegation and left for Europe on Sept. 2. This will enable him to make a study of the situation before the opening of the assembly in Geneva on Sept. 25. Two substitutes were also named, Hon. G. Howard Ferguson, Canadian High Commissioner in London, who is now in Canada, and J. Desay, of the London Office.

Value Of Gyro Compass

Soon Pay For Themselves When Used In Northern Waters

Gyro compasses may cost about \$5,000 but they soon pay for themselves, according to Capt. A. W. Gorton, commander of the "Pennyworth" of the Dalziel line.

The gyro compass is so constructed that it is immune from the effects of natural magnetism which upsets ordinary compasses in Hudson Bay waters.

The "Pennyworth" was equipped with a gyro before sailing to Churchill last year with the first cargo of imports.

A great need of the soil for crop growth is that of an air supply. Everyone realizes the importance of air for animals, but that is needed for plants as not such common knowledge.

The farmer in these times of stress is realizing more and more what it means to have a good garden and fruit plot, which cannot be developed satisfactorily without adequate protection. Perhaps it is on account of the very unsatisfactory farming conditions at the present time that more interest is being shown in tree planting than ever before. Then, too, more interest is being paid to the improvement of the farm home by plantings of ornamental shrubs and flowers.

Many who now have established shelter belts are getting very satisfactory results with fruit of various kinds, such as apples, cherries and all varieties of small fruits. Besides affording a very interesting line of work, practically all the fruit required for the farm family can be raised at home and often a very considerable surplus is raised which can readily be disposed of to neighbors at very remunerative prices.

At the Indian Head forestry station the grounds are laid out attractively planted with trees, ornamental shrubs, flowers and lawns and provide an excellent demonstration of what can be accomplished along these lines under prairie conditions. A small area is set aside also in which hardy varieties of apples and other tree fruits are grown, several acres of different kinds of trees in various mixtures, which are of particular interest to those who have any doubt as to the practicability

Forest Nursery Stations Show What Can Be Accomplished In Reforestation Of The West

The scheme under which trees are supplied by the Dominion government for prairie farm planting in Manitoba, Saskatchewan and Alberta, was first inaugurated in 1901 by the late Hon. Clifford Sifton, who was at that time Minister of the Interior. At that time the general opinion was that trees could not be grown on the prairie and for that reason it was very difficult to interest farmers in this line of work. In January and February of 1901 a large number of farmers' meetings were held in the three provinces, at which the scheme was discussed. Very little enthusiasm, however, was aroused, only some 50 farmers in the three provinces expressed willingness to try out what they considered a very doubtful experiment. These first few plantings were successful and next year there was a larger demand, and 470,000 young trees were supplied to 421 farmers. Neighbors became interested, encouraged by the success of these first plantings. In 1904 1,800,000 plants were furnished to 1,020 applicants. From then on the demand increased by leaps and bounds. In 1929, 6,500 applicants received 8,500,000 trees and since that time from 5,000 to 6,000 applicants have been supplied each year.

Up to date 133,500,000 trees and cuttings have been sent out from the nurseries, of which 2,500,000 were spruce and pine. The Scotch pine and spruce are the evergreens principally used, and these are sold at a very nominal cost. Next spring the charge for these will be \$2 per hundred. The broad leaf kinds, such as maple, ash, elm, caragana, poplars and willows are supplied free of charge provided the farmers make application before the first of March in the year previous to planting. That is, those wishing now to plant in 1935 must apply before March 1, 1934.

In order to ensure a supply of stock for distribution, two nurseries were established, one at Indian Head, Sask., and the other at Sutherland, Sask. The control of the work is organized at Indian Head where the main office is established.

Until 1930 the tree planting division was a part of the federal forestry branch under the department of the interior, but in the spring of that year, after the natural resources were turned over to the province, the forest service was reorganized and it was decided to transfer the tree planting division to the department of agriculture, so that the nurseries now are part of the experimental farms system, under Dr. E. S. Archibald, director of experimental farms, at Ottawa.

The results of the work which has been carried on from the Dominion nursery stations during the past 30 years is very evident to any who were familiar with conditions on the prairie farms in the earlier years of development. While conditions generally on the prairies are not particularly favorable for tree growth, it has, nevertheless, been conclusively demonstrated that when proper methods are employed, successful plantations are not really difficult to establish. On the prairies where rainfall is limited and climatic conditions extreme, plantations can only be successful when given proper attention. Where trees are neglected, they quickly deteriorate, but the benefits which may be derived from well planned shelter belts are so great that one is well repaid for the comparatively small amount of labor entailed in keeping them in good condition.

The farmer in these times of stress is realizing more and more what it means to have a good garden and fruit plot, which cannot be developed satisfactorily without adequate protection. Perhaps it is on account of the very unsatisfactory farming conditions at the present time that more interest is being shown in tree planting than ever before. Then, too, more interest is being paid to the improvement of the farm home by plantings of ornamental shrubs and flowers.

Many who now have established shelter belts are getting very satisfactory results with fruit of various kinds, such as apples, cherries and all varieties of small fruits. Besides affording a very interesting line of work, practically all the fruit required for the farm family can be raised at home and often a very considerable surplus is raised which can readily be disposed of to neighbors at very remunerative prices.

At the Indian Head forestry station the grounds are laid out attractively planted with trees, ornamental shrubs, flowers and lawns and provide an excellent demonstration of what can be accomplished along these lines under prairie conditions. A small area is set aside also in which hardy varieties of apples and other tree fruits are grown, several acres of different kinds of trees in various mixtures, which are of particular interest to those who have any doubt as to the practicability

Fame Is Borrowed

Livorno In Italy Neither Makes Or Breeds Chickens

Livorno, better known to the English-speaking world as Leghorn, is to have a new port. Work is proceeding on dredging and construction operations in the harbor, which shares with Genoa and Naples much of the maritime trade of Italy's Mediterranean seacoast.

"Livorno has been a main factor port since the days of the Medici," says a bulletin from the National Geographic Society. "When Italy's harbor near the mouth of the River Arno silted up in the sixteenth century, near by Livorno, then a village of less than 200 inhabitants, was selected by Cosimo, Grand Duke of Tuscany, to replace it."

"Livorno is best known under its anglicized name for two things: straw hats and chickens, for nearly every one has heard of Leghorn straws and Leghorn chickens. But Livorno doesn't produce hats nor does it breed chickens. Like Panama, which became famous for the closely woven hats of Ecuador merely because they passed through the Isthmus, Livorno has borrowed the fame of straw hats woven in the interior of Tuscany, chiefly around Florence. They come out through Livorno, or Leghorn, so to that city their origin is popularly credited."

"For the same reason a breed of small Italian chickens, sometimes referred to as the greatest of the great, the 'poultry world' were given the name of the port through which many of them were exported to America and to Great Britain."

Not Due To Ancestry

Mongrel Dog Can Be As Intelligent As Thoroughbred

One of the remarks most often heard when dogs are discussed is that the mongrel is both more intelligent and more trustworthy than the thoroughbred. It is charged that the thoroughbred is bred for "spits" without regard to anything else, so that in the course of time he becomes a half-wit. The mongrel is not bred at all, he just happens.

The dog expert of the London Morning Post, however, insists that the superior intelligence to the mongrel.

The truth probably is that intelligence in dogs, as in human beings, is not so much a matter of breeding as of individual capacity for understanding. Shakespeare, for example, had no noble blood, and his intellect was the best of his time in England. Elizabeth, who was descended from a long line of royal ancestors, and what in dogs is called a thoroughbred, had a finer intelligence than her ancestors or her successors in her own family.

But every dog owner will insist that the intelligence of his four-footed friend is due to the ancestry, whether mongrel or pedigreed. The only thing that matters, however, is the animal's intelligence.—New York Evening Post.

Live Only In Imagination

Characters Created By Famous Writers Will Never Die

There are many names that live and will live for years to come that never lived in the true sense of the word. I will instance a few. There was Hamlet for one, Pickwick another, and Sherlock Holmes a third. These only lived in the minds of Shakespeare, Dickens, and Conan Doyle. These characters live in the imagination of many thousands who have read about them, and in that way will continue to live.

Beetle That Fells Trees

In the forests of Brazil, South America, there are beetles which bring great trees to the ground. The horrid little creatures dig a sort of trench round the trunk, making it deeper and deeper, and at last the giant tree comes crashing down. A great deal of valuable timber is lost in this way every year.

An old bachelor says that it is impossible for a woman to do anything better than a man. Evidently he has never seen a woman pack a trunk.

A cold winter is predicted. Any kind of winter would be cold after this summer.

Somebody says nobility is more rampant at flower shows than anywhere else. Haughtiness, no doubt,

SWEEPSTAKE PRIZE

(London Express)

The sweepstake has taken an interesting turn. In fact, the turn is so interesting that even the National Government can hardly ignore the matter. Unimportant as it may seem to the Philosopher at Aix-les-Bains, the Government must decide quickly on a line of action.

For some years the Irish Free State has levied its toll upon Irish savings. While maintaining the fiction that to declare a thing illegal is the same thing as to suppress it, our authorities here have permitted Irish agents to take millions of British pounds out of the country for the benefit of the promoters, the Free State Government and the Irish hospitals. Prosecutions have been intermittent and ludicrous. In one case a magistrate who tried a vendor of tickets was in possession of one himself. When the Duke of Atholl organized a British sweepstake the authorities were more thorough. They suppressed it. Now the duke is reduced to asking "sportsmen" to give him a million ten-shilling notes, "to be used entirely according to his discretion. At this meet the national demand for hypocrisy no objection is made.

Now France enters the scene. The French do not like to see their money leave the country for any purpose. But when it goes to a foreign country in connection with a sweepstake such as the Irish one both the pride and the pocket are touched. In France that means action. Thus the first official French sweepstake is to be launched in a few days. There are to be no profits for promoters. Expenses are to be kept to the minimum. The winners are to get 60 per cent. and the balance will be used to aid unemployment and agriculture.

With Gallic thoroughness the new lottery will be launched while a large number of British visitors are in France. They will become the vanguard for the penetration of Britain (the ultimate objective of all sweepstake directors). No longer will the cognate of the casino be the only resort of British gamblers. French sweepstake will draw in the little fellow who cannot afford to travel. Thus does France intend to keep its own and British money in France.

The "Daily Express" suggests that the situation can be met simply and thoroughly. There is no use protesting to the Free State or to France. They are perfectly within their rights. But

**DR. MOONEY HEADS
 ALBERTA MEDICOS**

Calgary—Dr. Bernard Mooney of Ed-
 monton, was elected president of the
 Alberta Medical Association at the
 Annual Convention last Wednesday.
 He succeeded Dr. H. A. Gibson, of Cal-
 gary.

Other officers elected included Dr.

A. H. Baker, Calgary, first vice-pres-
 ident; Dr. George R. Johnson, Calgary,
 secretary and Dr. W. T. Hynes, Cal-
 cumbie, Alta., treasurer.

Next year the Alberta Medical asso-
 ciation convention will be held in Cal-
 gary in connection with the annual
 convention of the Canadian Medical
 Association.

"OUR SOCIAL PROBLEMS"
 Lacombe is to have a distinguished
 visitor on Sunday evening, Sept. 24th,
 when Dr. H. R. Grant will speak in the
 United Church. Dr. Grant, who is a
 Graduate of Queens University has just
 completed twenty-five years as Sec-
 retary of the Social Service Council of
 Nova Scotia. The Halifax Herald, re-
 ferring to this event, stated "Dr. Grant
 is a doughty and uncompromising
 champion of Temperance, an honorable
 gentleman and friendly—that is, to ev-
 eryone and everything excepting the
 things against which he has been bat-
 tling with such zeal and determination
 for so many years. He is also an in-
 teresting and arresting speaker."

No other man in Nova Scotia has
 done more for the "down and out"
 than he; and thousands think of him as
 the friend who brought self-respect
 and happiness to their homes.
 Lacombe citizens will enjoy hearing
 Dr. Grant as he speaks on "Our Social
 Problems and their relation to the
 Liquor Traffic."

He will speak at Fairview at 1:30
 on Sunday, and at Clive on Monday
 evening at 8 p.m.

NATURE LEADS IN CROP RESTRICTION

The part that Mother Nature has
 played in the United States campaign
 to reduce natural products is seen by
 the final crop figures just issued. Here
 are the results:
 Wheat—Smallest crop in 37 years.
 Oats—Lowest production in 39 years.
 Rye—Never so small a crop in 46
 years.

Flaxseed—Smallest in 14 years and
 only slightly over 1913 low record.
 Barley—Lower than recent years and
 about equal to average for 1906-1922.

Corn—Larger than 1931 and 1932,
 but much lower than average.
 In Western Canada the same devel-
 opment has occurred. The wheat yield
 this year is estimated at 24,000,000
 bushels as compared with over 100,
 000,000 bushels last year, and other
 field crops show a corresponding de-
 cline.

THE W.M.S.

Mrs. R. L. Milner conducted the
 study topic on Christian Stewardship,
 at the regular meeting of the W.M.S.,
 held at the home of Mrs. J. N. B.
 MacDonald on Tuesday, Sept. 19th.
 Assisting Mrs. Milner were Mrs. O.
 Young, Mrs. H. E. Carruthers and
 Mrs. Todd. Points stressed were the
 consideration of the "Love" gift, a
 checking up of one's resources spiri-
 tually, mentally, financially, the pow-
 er of prayer.

Supply secretary reported the lay-
 ette almost completed. Nearly all the
 autograph quilt blocks have been
 turned in and Mrs. R. Ramsey, Mrs.
 G. Ramsey, Mrs. A. Gilmore and Mrs.
 W. Dowling volunteered to assist
 Mrs. P. MacDonald in assembling the
 quilt.

Devotional exercises were led by
 Mrs. A. Gilmore, who briefly remark-
 ing on the parable of the talents, said
 "To cling to one's prejudices is to cut
 off one's growth at the roots."

The next meeting is to be at the
 home of Mrs. S. P. Milman. The pro-
 gram for the year is as follows:
 Oct. Y.W.A., Mrs. A. Gilmore; Nov.
 C.G.I.T. groups, Mrs. W. C. Sweet;
 Dec. Mission Bands, Mrs. R. B. Lay-
 ton; Jan. Baby Bands, Mrs. Geo. Ram-
 sey; Feb. Associate Helpers, Mrs. P.
 MacDonald; March, Supplies, Mrs. A.
 Gilmore; April, Strangers, Mrs. C.
 Danner; May, Literature and Mission-
 ary Monthly, Mrs. W. Dowling; June,
 Temperance and Press, Mrs. C. E.
 Todd.

WORLD HAPPENINGS
BRIEFLY TOLD

The "Royal Scot" which has visited Chicago World's Fair, will arrive in Canada at Vancouver. It will start its Dominion tour October 28.

Terms of a Franco-Russian commercial agreement for an interchange of products between the two countries was reported reached recently, following long negotiations.

Falling asleep in his father's grain shed at Carvel, Alta., Mike Shalge, aged three years, was instantly killed when his father, not noticing the sleeping boy, ran a binder over him.

Archibald C. Manberg, 41, former Canadian lumber trader, commissioner in London, England, and prominent in Canadian lumber circles, died in hospital at Toronto, after a long illness.

The third plane bought by the government of Saskatchewan from the Royal Canadian Air Force this summer has been brought from Ottawa with Flight Lieutenant F. M. Carter, chief pilot of the Saskatchewan flying service, at the controls.

Boys are better cooks than girls competing at the Canadian National exhibition, Toronto. Five classes—bread, rolls and buns, baking powder biscuits, ginger-bread and cookies—saw boys win nine places and girls eight in the 17 awards.

Moving of freight across Fitzgerald-Fort Smith 16-mile portage by aeroplane now is under way, according to reports received from the portage. The freight is placed aboard the "planes" at Fitzgerald and flown to Fort Smith at the rate of one ton per hour.

Canada's new conversion loan may possibly be launched around Oct. 1 instead of Oct. 15, the date previously under consideration, according to well-informed circles. The success of the Canadian loan in London and the "improvement" generally in the money market are given as reasons for moving the date ahead.

Do Not Like Restrictions

Maximum Hours Mean Nothing To Men Doing Creative Work

An American service organization advises its clients that it has signed President Roosevelt's agreement regarding minimum wages and maximum hours and has certified that the conditions are already operative in the organization "except as to staff executives whose hours of labor cannot be limited."

Laws can be passed to put a definite limit on the number of hours of physical labor any person may be asked to do in one week. Laws can be passed to fix minimum hours for routine work of "white collar" subordinates who have no ambition ever to be more than subordinates. But there is no law that human ingenuity can devise to fix a maximum working week for brains. A man might come to his office at 10 o'clock and leave at 4 o'clock and still be the hardest worker in his organization for his mind would probably be concentrated on his business problems for most of the balance of the day.

The men who are really doing the creative work of industry ask nothing but the privilege of working as hard as they like for as long as they like.—Financial Post.

Pier Staying On Ship

Port of Churchill Has No Attraction For Sailors

While skippers of the deep water vessels who have arrived at Churchill this season say they are delighted with prospects of business in and out of the port, the crews turn a sad eye on the construction camps and the townsite.

They claim it is the dullness of all the 57 varieties of ports they visit in the course of a year or two. Sailors coming ashore, for the most part, play an odd game of English billiards, sip an occasional brandy, and purchase a few picture post cards of Eskimos.

Then sighing for the "wine, women and song" of other harbor-fronts, they crunch their way over the gravel heaps and go aboard their various ships.

Lens Made In Layers

British Opticians Have Perfected Unbreakable Glass For Spectacles

The great fear of spectacles being broken while worn and causing serious injury to the wearer is to be removed following long research by British opticians.

A lens made in layers, which said the manufacturer to a newspaper representative, did not break when hit with a hammer, has been perfected.

It was tested for 500 hours with ultra-violet rays; boiled up to 500 degrees Fahrenheit, and baked in an oven.

After that it was frozen in a refrigerator.

More than four-fifths of the tonnage passing through the Panama Canal from the Pacific coast in the last fiscal year went to Europe.

Bad luck ruins one man in a hundred, good luck spoils most of the others.

W. N. U. 2010

Gas From Coal

Huge Industry Being Established, An Industry Which Will Furnish Much Employment

One of the most striking of all the developments that have recently taken place in Great Britain is that of the production of petrol from coal. A week or so ago Prime Minister Ramsay MacDonald announced in the House of Commons that it had been decided to place a preference of fourpence a gallon on petrol so produced, and this was immediately followed by the public statement of the Imperial Chemical Industries that the construction of a plant to cost \$35,000,000 at Billingham-on-Tees would be proceeded with at once.

This plant will produce 10,000,000 gallons of petrol a year. It will provide employment for 2,000 workers, and will absorb the mine production of three thousand miners, that is \$50,000 tons of coal a year.

Another plant is to be erected, probably at Consett, which will give 20,000,000 gallons, giving work to 10,000 miners, and other plants are to be built throughout the coalfields in South Wales, Northumberland, Lancashire, Forest and Dean and possibly Kent. As soon as construction begins work for 7,000 will be provided, it is estimated. Further the iron and steel industries will be immensely stimulated, and seven thousand more men will be required in the near future.

For years scientists have been engaged in endeavoring to perfect the process of obtaining petrol from coal. It has now reached the commercial stage and it is reckoned that a high quality coal can be produced for seven pence per gallon. But the preliminary experiments have been costly, the expenditures on them being estimated at \$250,000,000.

This great new industry is proving a veritable stimulus to Great Britain in its efforts to establish trade recovery. The benefits that will be derived from it by the coal industry, and others are hardly to be imagined. To the coal miners, who have been such heavy sufferers by the decline in trade, it will be a godsend.—Regina Daily Star.

Recipes For This Week

(By Betty Barclay)

PARSNIP SOUFFLE

Cook four medium-size parsnips in boiling water until tender. Remove skins and rub through a colander. Mix together one teaspoon salt, one-eighth teaspoon pepper, two teaspoons sugar and the parsnips together with one tablespoon butter. Melt two tablespoons of butter in a saucepan, stirring in two tablespoons flour and one cup milk. When the mixture is thick and smooth add to the parsnips, together with the yolks of two well-beaten eggs. Beat the white of the eggs until stiff and fold into the mixture. Place in a well-buttered baking dish and bake for 25 minutes in a moderate oven. Remove and serve immediately.

BLUEBERRY AND APPLE CONSERVE

2 cups blueberries.
2 cups tart apples, diced.
3 cups sugar.
½ cup nut meats, chopped.
Juice of 1 lemon, grated.
Rind of one-half lemon, grated.
Combine all the ingredients except the nut meats. Cook until the mixture is thick and clear. Add the nut meats just before taking from the fire. Pour into hot, clean glasses. Seal tight.

Boothblack Left Fortune

Accumulated Large Estate In Last Thirty-Five Years

Pietro A. Ierardi, of Elmford, who accumulated a fortune shining shoes, left an estate of \$150,815 gross and \$121,091 net, according to a transfer tax appraisal of the estate which died on July 7, 1932, owned the boothblack concessions in the Grand Central Terminal in New York for 35 years. A native of Naples, he came to America when he was 15 years old and started his career as a boothblack on the streets. Only 117 of his estate was in stocks and bonds. He had \$98,900 in New York and Westchester real estate, 11 bank accounts totalling \$21,000 and mortgages totalling \$7,289.

Taking No Chances

Owners of private cars in one South African town are compelled to take out "exemption certificates," costing \$1.25, before they can either drive with their wives as passengers or be themselves driven by a chauffeur, as both these actions are regarded as offences against the auto transport law.

Artificially dried hay contains practically 100 per cent. of the nutrient value of the original grass, vitamins included, and cows fed on it produce milk and cream of the same quality as produced when they are eating summer grass.

Teacher (in geography lesson)—Now, can anybody tell me where we find mangoes?

Knowing little boy—Yes, miss, wherever woman goes.

France's new pocket torpedo boat has outdistanced some of the fastest speed boats on the Seine.

By Ruth Rogers

SNAPPY WEARABLE AND CHIC

Develop this modish dress in this plain rough woven weave in grey, topped by a tweedy striped grey woolen. You'll love it because it has so much dash and chic.

Plain or printed silks are also suitable. It is lovely in grey crinkly crepe silk with short puffed sleeves as in the small view.

Style No. 580 is designed in sizes 14, 16, 18, 20, 22, 24, 26, 28, 30 and 32 inches bust.

Size 16 requires 2½ yards of 35-inch material for skirt and collar with ¼ yard of 35-inch material for waist.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

For PIES, PASTRIES AND MILK PUDDINGS

At my good cook to tell you the secret of the success and delicious she will tell you that to get a delicious, rich, improved recipe for your pudding you should use the ST. CHARLES MILK.

ST. CHARLES MILK
UNWEETENED EVAPORATED

OCCASIONAL WIFE

By EDNA ROBB WEBSTER
Author of "Joretta," "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt, young and beautiful, falls in love with Peter Anson, fellow student in an art school. She is the adopted daughter of a wealthy family, and he is a poor, struggling sculptor. On their first date Peter spends most of his money to show Camilla a good time, and then decides he must give her up because he cannot stand the financial pace. A chance meeting, however, proves the way for another date. This time they walk in the park.

(Now Go On With The Story.)

CHAPTER VII

"You think I am going to art school for the novelty of having something to do," Camilla began, as they walked through the park, "and that I haven't a serious thought in my head. You think I am a girl with a fortune and not an idea of earning a penny of my own. That's the girl you think I am. But you're wrong. My classes at National are only a part of my training to become a commercial artist. That means I want to work, and have to work. I'm not dabbling with art for a pastime, as you have been thinking."

Finally Peter said, "Know what? I'm glad to know that you are ambitious to do something for yourself, and all that, but what's that got to do with my forgetting you and your being busy?"

"Because I'm just a poor little girl who has to earn my own living after the first of September, next," Peter was puzzled. "But you are the Hoyt girl, aren't you? I supposed you were only dabbling in art for amusement. Are you really serious?"

"Just as serious as my situation. I really am a little frightened, Mr. Anson—about earning my living. I mean. Sometimes I get to wondering how I could be of any service that would be worth money to people."

"But your fortune..."

"I have no fortune, and my name is not Hoyt, really."

He shook his head in bewilderment. "I'm still floundering."

"I don't mind telling you all about it, if you still care to listen."

"I'm very anxious to know."

Camilla turned on the bench facing him, and began earnestly, like a child reciting a story. "To begin at the beginning, I am one of a family of nine children—the middle one. My real name is Lorenz. But I didn't know that until three years ago, when I had been riding in the clouds for fourteen years and suddenly had to come down to earth in a parachute. I almost got tangled up in the strings and things, but I finally landed feet first and looked around to see where I was. It wasn't such a beautiful place as I had left, either."

"But how did you get up in the clouds in the first place?" Peter interrupted, amused by her quaint metaphor.

"Oh yes, I'm getting ahead of my story. I went up when I was four years old. It was this way. My people had come to America before I was born, and they hadn't done so well here at that time, it seems. Anyway, once when I was four years old, a volunteer social relief worker came to our house to tell mother how to put more water in the soup kettle so that she could feed nine mouths with half rations. Of course, my mother having lived in southern Europe, where many of the people are on half rations most of the time, and the wealthy Mrs. Hoyt never having known how soup was made—she could do that. Anyway, it seems that

Facts. Naturally, it was a shock. Then I learned that my foster mother was ambitious for me to marry wealthy, which would solve my problem very nicely. Prospects were offered to me continually, always with the caveat: "Remember that I'm the Hoyt heiress, to double the attraction. Foreign titles, industrial fortunes social leaders. I despised it all. At first, I announced that I would leave them and be independent. But I learned that it was legally arranged for me to live as Camilla Hoyt until I was twenty-one. So I decided to make the best of it by training myself, while I had the chance, to make my living after I was dismissed from my adoption. Of course, I had to defy their wishes, by studying to be self-supporting instead of angling to be the mistress of a fortune. That's why I have the blues," she concluded suddenly. "I'm sorry I troubled you. I don't know why I should tell you, Mr. Anson."

"I do," he declared vehemently. "Because I've been waiting terribly to know you ever since the first time I saw you—but I didn't dare to presume to a friendship with Miss Hoyt. I can be a friend to Camilla Lorenz."

"Why do you say that?" she asked with surprise.

"Because I am only Peter Anson, struggling for my degrees and possibly by a scholarship with a year in Paris, and not a dollar in the world to back me."

A little glow of horror escaped her. "And I let you spend all that money on me the other night?" her voice almost sobbed.

He laughed shortly. "That was rather a strain. But I'll manage," cheerfully. "Did you think I was bent on P. Morgan?"

"I didn't know," with consternation. "You see I really haven't much sense yet about money—in that way. And you impressed me so with your importance. I didn't care a thing about the show and the Madison Club, but I thought if I didn't suspect the swankiest places in town, you would laugh at me. I don't mind if other people laugh at me, but I didn't want you to," her voice was almost a whisper. "If only I had known—can you forgive me, ever—Peter?"

"Camilla, why, you darling—you're crying—please don't."

She was in his arms, their faces pressed close, trembling with happiness. "Peter—I'm crying because—I'm so happy—to be here with you, she whispered. "The blues are all gone for always."

(To Be Continued.)

Wheat For United Kingdom

Canada Supplied 50 Per Cent. Of Imports During Last Nine Months

During the nine months beginning November last, when the empire agreements went into effect, imports of wheat by the United Kingdom totalled 151,796,000 bushels compared with 150,070,000 in the same period of 1931-32, says a report issued by the Dominion Bureau of Statistics. Of this amount Canada supplied 76,237,000 as against 46,744,000, a gain of 63 per cent.

The next contributor was Australia, with 40,776,000 bushels as against 33,853,000, a gain of 20 per cent. The 29,474,000 supply from the Argentine was a decrease of 23 per cent, the 350,000 from Russia, 97 per cent. decrease, and the 764,000 from the United States a 92 per cent. decrease. Canada in the last nine months supplied 50 per cent. of the imported wheat in the British market, compared with 31 per cent. in the corresponding nine months of the previous year, Australia 26 per cent compared with 22, and the Argentine 19 per cent, compared with 25. The proportion from empire countries was 77 per cent. as against 53 per cent, a gain of 24 per cent.

Tenth Vacancy In Senate

Ten Vacant Seats In Upper House Will Have To Be Filled

The death of Senator G. D. Robertson created the tenth vacancy in the Upper House.

Of this number, three are in Ontario, two in Saskatchewan, two in Quebec, two in New Brunswick and one in Nova Scotia. The present standing of the parties in the senate, inclusive of the 10 vacancies which will have to be filled, are 46 for the government and 40 for the Liberals.

"Reparated Celery"

The experiment by which Canadian-grown celery plants were matured in Bermuda and brought back to Canada in Canadian National ships for the spring market, has been successful. Some marketeers have called the product "reparated celery." Bermuda and the British West Indies have come to be known as Canada's winter garden and tropical fruitland.

A Noiseless Airplane

"As silent as an aeroplane" may be the apt phrase of the immediate future to describe the noiseless operation of a machine, if the tests now being made by the research department of the air ministry in Great Britain come up to expectations. A silencer and reduction gear used on a specially made engine have rendered at least one aeroplane practically noiseless.

In Italy silk is now used for the covering of saunas. What is used for the inside remains as ever a mystery.

★ ★ AN EASY WAY OUT OF A MEAN JOB ★ ★

CLARA—WHAT'S GOOD TO TAKE UGLY YELLOW STAINS OFF TOILET BOWLS? I'VE SCRUBBED AND SCRUBBED AND THEY DON'T COME OFF—

WELL—I ALWAYS USE GILLETT'S PURE FLAKE LYE—IT FLUSHES THEM OFF WITHOUT SCRUBBING—I'LL BUY A TIN TODAY

MY—THIS SURELY IS AN EASY WAY TO DO AN UPLEASANT JOB. I'M GOING TO TELL EVERYONE WHAT A BIG HELP GILLETT'S LYE IS.

LATER

Free Booklet

The Gillett's Lye Booklet tells you how to avoid drudgery by using this powerful cleanser and disinfectant for dozens of every cleaning job.

Also contains full directions for soap making, dyeing and other uses on the farm. Ask for free copy, Standard Brands Limited, Fraser Avenue & Liberty Street, Toronto, Ontario.

Never dissolve lye in hot water. The action of the lye itself heats the water.

Stains flush off with Gillett's Lye...

ONCE a week just pour Gillett's Lye—full strength—down your toilet bowls and drains. It removes all stubborn stains without hard scrubbing and rubbing. Cannot harm enamel, is non-injurious to plumbing. Kills germs and banishes odors, too.

Keep a solution of Gillett's Pure Flake Lye on hand for all your household cleaning. One teaspoonful dissolved in a quart of cold water

makes a safe, economical cleanser. Use it for greasy pots and pans, the kitchen floor, sinks and bathtubs.

And be sure to get the genuine Gillett's Pure Flake Lye. Order a tin today. Ask for it by name at your grocer's.

GILLETT'S LYE

EATS DIRT

Restore Depleted Funds

Appeal For Restoration Of Anglican Church Funds Meets With Hearty Response

Continuance of every phase of Anglican activity in the ecclesiastical province of Rupert's Land is assured through the remarkable response to the Dominion-wide appeal of the restoration fund committee of the Church of England in Canada.

Addressing members of maritime and Ontario church clubs at a dinner in Toronto, Rev. Canon S. Gould, director of the appeal, declared subscription to the restoration fund and the special episcopal and clerical maintenance fund had reached \$870,226, of which \$423,063 was in cash.

The campaign for funds began in April, the church appealing for the restoration of episcopal and other endowments of Rupert's Land amounting to approximately \$760,000. These funds were dissipated while under the administration of J. A. MacKay, K.C., Winnipeg. The total object of the restoration of the episcopal was enlarged to include \$100,000 for the pension fund of the church and \$200,000 to provide assistance for other dioceses in the Dominion.

Subscriptions to the restoration fund to date totalled \$772,458, and of this sum \$395,288 was in cash, Canon Gould said.

The director of the appeal emphasized that no work had fallen into abeyance in the west as a result of the defalcations disclosed a year ago at Winnipeg. All pensions were honored and all stipends paid.

A Good Farm

In Continuous Cultivation Since 1878 And Still Producing Fine Crops

The Robertson farm, 4½ miles south of Dugald, and now owned by A. Robertson, has just completed threshing with the following excellent results in spite of drought, heat and hoppers: Marquis wheat averaged 28 bushels; Trebi barley, 53, and oats, 46 bushels. This farm has been in continuous cultivation since 1878. When the motive power was oxen. The then owner, Moses Robertson, had a tragic end. The following winter he went for a load of wood, was caught in a blizzard and was later found frozen to death. The oxen escaped and wandered away as far as St. Anne. The pioneer homesteader passed, but the land remains and is still fruitful.—Winnipeg Free Press

One Of Life's Tragedies

Two Die In Same Way Under Vastly Different Conditions

One of life's most ironic tragedies the other night in New York received but scant news attention. A man, worn out with the struggle against poverty, spent his last night in the Automat Restaurant for roll. He died of a deadly poison on the role part of it, then staggered to the washroom and dropped dead. A miserly woman at the same table seized the portion of the roll the suicide left and ate it. She too collapsed and died on the way to the hospital.

An investigation showed she was comparatively rich with nearly \$60,000 in various banks.

The man died in a battle against poverty, the woman in a greedy effort to save a nickel to add to her store.

Imported Industries

Just as the Huguenot fugitives from the industrial towns of France and Flanders brought to England cloth-weaving and silk-spinning, so have Jewish immigrants been largely responsible for the introduction into America of such trades as those of wholesale clothing manufacturing, machine bootmaking, machine clothing-making, etc.

Not To Be Barbed At

Canada's imports of hot dog skins are not to be taxed at. According to the Bureau of Statistics, the Dominion imported \$66,923 worth of wiener wrappers during June, an increase of \$64,668 over June, 1932. During the 12 months ended in June the total was \$421,000, compared with \$375,000 in the previous 12 months.

A glass radio-phonograph is being displayed in Glasgow, Scotland.

Wolves Attack Grizzly Bear

Rare Drama Of The Wild Witnessed By Tourists In The Rockies

A death fight between a grizzly and two large wolves, with the bowl of lofty Citadel Pass as the amphitheatre, was the rare drama of the wild witnessed by Mr. and Mrs. C. Leach of London, England, and East Africa.

With Mrs. Pat Brewster of Banff, the couple were en route to the Mount Assiniboine alpine camp when, turning a sharp corner of Citadel mountain, on the Great Divide, they were horrified to see a grizzly charging madly towards them. Instantly they halted their horses then, as the bear stopped and sat 100 yards from them, they saw two large wolves were worrying it, jumping in and out, one at its head and one at its rear.

The almost comical bear was granted not a moment's respite in the fight that may have been going on for hours, perhaps days. Another rush and the battle moved to within 10 yards of the humans. The bear's distress was plain. Nimbly the wolves dodged its blows by inches. The next rush carried the battle to a small circular knoll, no higher than the grizzly itself. The curtain rang down as the bear fell to its finish behind the knoll.

Freighter Again In Service

German Boat Was Sunk By Russians During War

After spending eight years on the bottom of the Baltic Sea and still using the same engines and boilers that were put into her at Hamburg 51 years ago, the "Leonore," a German freighter registered at 922 tons, shows the big boats "how it's done." The little freighter sailed from Montreal recently on her way to Holland from Chicago. She had carried a cargo of Baltic port to Green Bay, on Lake Michigan, thus gaining the distinction of being the first ship in 22 years to make the run from a European port to Chicago.

The "Leonore" has had many adventures, but the most serious one came during the war when she was docked in the port of Lithau, now owned by Lithuania. It was in 1916 and the Russians had decided to block the entrance of the harbor by sinking a number of ships. Of the 40 ships sent to the bottom as a protection against German ships, the "Leonore" was one, and there she lay for eight long years until in 1924 it was decided to clear the harbor and the sunken vessels were refloated.

New Stabilizer For Boats

Claimed To Prevent Damaged Ships From Rolling and Sinking

A new control is going to be tested out shortly on board the French destroyer "Etourd." This new type of stabilizer, is claimed, will prevent damaged ships from sinking, as well as pitching and rolling.

It is controlled by hand, much as an air pilot controls the stabilizer of his aeroplane and is not automatic. Known as the "kefali," the stabilizer really consists of a system of blades sent to the bottom as a protection against German ships, the "Leonore" was one, and there she lay for eight long years until in 1924 it was decided to clear the harbor and the sunken vessels were refloated.

More than 19,925,000,000 cigarettes were made in China in the first half of 1932.

Among the flying pupils at the aerodrome in Heston, England, are two boys aged nine and ten years.

Auto deaths in London are growing.

When Your Daughter Comes to Womanhood

Give Her Lydia E. Pinkham's Vegetable Compound

Most girls in their teens need a tonic and regulator. Give your daughter Lydia E. Pinkham's Vegetable Compound for the next few months. Teach her how to guard her health at this critical time. When she is a happy, healthy wife and mother she will thank you.

Grasshopper Infestation

Vast Acreage In Saskatchewan and Manitoba Faced With Outbreak

More than 16,000,000 acres of Saskatchewan grain growing areas are faced with a serious grasshopper infestation for 1934, and the provincial government is inaugurating an educational preventive campaign to combat the menace. The 16,000,000 acres represent practically half the entire area of the province under cultivation.

Manitoba is faced with an egg infestation covering two and a half million acres, which is deemed serious, but the prospects facing Saskatchewan for 1934 are much worse, Hon. W. C. Buckle, Minister of Agriculture, stated.

The Dominion entomological branch of the Department of Agriculture is making a survey of the province with a view to having detailed statistics covering all infested areas as a means of meeting the situation.

Pays In Protection

Well-Equipped Fire Department Is Not An Expense

There are those who complain about the expense of maintaining adequate fire-fighting equipment, who quibble over outlays to keep such equipment up-to-date. A modern and well-equipped fire department pays for itself many times over, however, in the protection that is afforded inhabitants and in the prompt means of dealing with insipient outbreaks each capable of developing into a catastrophe which the community thus commands.

THE RHYMING OPTIMIST

By Allan Macdonald

WITHIN THE DREAM

In truth, I know I cannot mold Life's ways to my desire; But could you know the hopes I hold, My vision's flower and fire!

Could you not glimpse the loveliness Which is my goal and guide, Like shine and sheen of April's dream, Like sunset on the tide;

You, too, would then forget the care, The burden of the day, Could you in this rich dower share Of glory's hidden way!

The world, perhaps, must laugh at me, The dreamer passing by, With spirit undreeding in ecstasy And rapit, unseeing eye.

But though I know I cannot mold Earth's ways to my desire, I dwell within the dream I hold, My vision's flower and fire!

Steel Mill Receives Order

Big Order For Nails For British Market First In 14 Years

Announcement was made that the Dominion Steel and Coal Corporation had received an order for 1,000 tons of nails for the British market, first of its kind in 14 years.

The nail mill at the corporation's Sydney plant will begin production on the order immediately, employing about 130 men. The plant has not filled out a British nail order since 1919.

Zoo Animals On Air

A monkey, a cockatoo, a boa constrictor, an alligator, a python, a mynah (a kind of starling from India) and a toucan recently appeared before a B.B.C. microphone and television projector to give a broadcast. Leonard Henry, the cockatoo, was the oldest—he is over 60—and the most talkative of this Zoo variety company.

It is true that around the world English is rapidly becoming in effect a universal language. Oddly enough the language of business, while French remains the universal tongue of scholars and diplomats.

Belfast, Ireland, is to have an aerodrome on ground reclaimed from the harbor.

Little Helps For This Week

"They go from strength to strength."—Psalm 74:7.

"First the blade, then the ear, then the full corn in the ear."—Mark 4:28.

Build these more stately mansions oh my soul.

As the swift seasons roll; Leave thy low-vaunted past; Let each new temple nobler than the last.

Shut thee from heaven with a dome more vast.

Thou shalt at length be free. Leaving this outgrown shell by life's unrelenting sea.

—O. W. Holmes.

High hearts are not long without bearing some new call, some distant clarion of God, even in their dreams, and soon they are observed to break up their camp of ease and start on some new fresh march of faithful service. And looking higher still we find those who never wait until their moral work accumulates who do the good only to see the better, and see the better only to achieve it, who are faithful for remorse, too earnest for repose, whose worship is action, and whose action is ceaseless aspiration —J. Martineau.

Programme Of Works

Saskatchewan Relief Recipients May Have Opportunity To Work Out Indebtedness

A programme of works sponsored by town and village councils to work out the indebtedness of relief recipients will shortly be proposed by the Saskatchewan Relief Commission according to unofficial information.

If the scheme meets with the approval of the town and village councils, it will provide for the inauguration of individual programmes of works to be started after the harvest, providing for the improvement of streets, beautification of public grounds and other community undertakings of various kinds.

Such a scheme would involve no expenditures on the part of the commission, it is understood, but rather would afford an opportunity for relief recipients working out their present indebtedness to the commission by virtue of 1931 and 1932 advances.

Keep Japanese Beetle Out

Canadian Inspectors Take Precautions At All Places Of Entry

The Japanese beetle, which invaded the United States in 1916, has so far been held at bay on the Canadian frontier by the inspectors of the Dominion entomological branch, who have intercepted adult beetles, both alive and dead, several times in shipments of various kinds from the south. Precautions are taken at all places of entry into Canada. Dead beetles were found in a motor car at Yarmouth, N.S., and in a car at Niagara Falls, and nine in a shipment of aquatic plants. The beetle in the grub stage feeds on grasses, and as an adult on fruits and foliage of various trees. It is a most destructive pest, its present area of depredations being Massachusetts and New York States.

Chinese Trainmen Executed

Three trainmen whose alleged carelessness resulted in a wreck between Kluang and Nanchang that caused between 30 and 50 persons to be killed or hurt were executed by Chinese authorities. The wreck occurred when the train jumped the track of the 500 passengers, 200 were military cadets.

"Canada imported nearly 3,000,000 pounds of peanuts from the United States between January 1 to August 1."

CANADA'S "RECOVERY SLOGAN"

(The Bulletin)

Premier Bennett repeated at Toronto and at Newmarket, in substance and almost verbatim, the speech he made at Montreal on arrival from England. This establishes that the observations he made at Montreal were not the off-hand remarks of a man called upon to respond to a public reception without much time for reflection or for study of the local conditions from which he had been for some time absent. What he said there, he is saying elsewhere, and must be assumed to be the calculated basis upon which he intends to shape the administration of public affairs and the legislation that is to be brought down when parliament assembles.

The text of this three-rep speech is: since Canada must trade abroad there can for us be no such thing as experimenting with shorter hours or higher wages. We must keep down production costs if we are to sell our goods to foreigners, and must work long hours and accept small pay

in order to do so. The United States may develop a self-contained economy; Canada cannot; that is what the argument amounts to.

No one in his senses will dispute that Canada's welfare is closely linked with foreign trade. The sad records of the last three years prove that clearly enough. In 1930 our trade with foreign countries amounted to \$2,392,000,000 and the country was fairly prosperous. For the last reported twelve months it amounted to \$864,000,000—and conditions are what they are. Canadians do not need to be told what the slump in foreign trade meant to them. It meant ruined hopes, lost farms, vanished investments, years of idleness, mounting debts. Mr. Bennett is not responsible for the loss of two out of every three dollars of our former exports and imports; but his trade policy was definitely aimed to produce that result, and has helped in substantial measure.

In any case the trade is gone, all but a remnant, and it will take years to regain it. And so far as the public

are aware Mr. Bennett has no notion of reversing his policy and setting out vigorously to recover what we have lost.

The question now is what shift can be made to restore national prosperity without the advantage of the foreign markets we formerly had. Telling us to work long hours at small pay, in order to build up more unalike surpluses, does not mean a thing to the farmer who has more wheat than he can sell at a profit or the employee whose time and pay has been cut because the boss cannot find sale for his products.

One point is to be noted just here. Canada needs foreign markets for its surplus products of course. But the first business of the people of Canada is not to supply cheap wheat to Europe, or low-priced automobiles to Siam, or cut-rate lumber to China, or subsidized coal to Chile. Their first task is to feed, clothe and house themselves out of the abundant resources with which nature has stocked their half of the continent.

That is sound Conservative doctrine, preached by every leader of the party from the days of Sir John Macdonald to the time Mr. Bennett left for the World Economic Conference and is precisely what Canadians now find that they cannot do, and are less able to do in proportion as they work longer hours and get less of it. What is the point in signing an agreement at London to restrict the production of wheat and then coming home to tell the farmers of Canada to work hard and produce more of it? This is a depression of "too much", not too little.

So far as noted, those Canadians who are still at work are not clamoring for shorter hours, nor expecting higher pay. Most of them are content to keep going as long as they now do, and are thankful to get what they are getting. These are not the people who need Mr. Bennett's attention, and they require no admonitions on the subject of industry and self-discipline.

The people about whom the government in Canada should be thinking, and about whom working Canadians have to think, are the hundreds of thousands of men who have no work at all and no pay. Just how with our foreign trade all shot to pieces, would these be provided with jobs if those who are now at work were to work even longer hours than they do? And just how are they to be supported indefinitely in idleness if those who are working do not get higher pay, or even accept smaller pay?

The problem of Canada is not the man who has a job, whether or not he thinks his wages should be short and his pay higher. That problem is the man who hasn't any job and is on "relief". And for that problem there is no solution in the slogan "long hours and small pay."
